Coderetreat

🕐 Duration: 1 Days
🗾 Available Languages: English German

Audience

Software Crafters: Developers who want to improve their coding skills.

Precondition

Good knowledge of a programming language.

Goals

Practically improve your coding skills by practicing Clean Code principles in a practical workshop.

Contents

- Pair Programming with changing pairs
- TDD — Test-Driven Development
- Red-Green-Refactor Cycle
- Typical Constraints
    # No (re-)-Assignment Statements
    # No conditionals
    # No loops
    # Mute
    # And many more
- Retrospectives to inspect and adapt your coding skills

Note that this offer is for companies who want to run an internal coderetreat. If you, as an individual, are interested in attending a coderetreat yourself, please checkout our Events section. We host public coderetreats which sponsored by companies to be free of cost for the attendees.
