

Git Crash Course

 Duration: 0.5 Days

 Available Languages: English German

Audience

Software Developers, Software Architects, Testers, Tech Leads, Technical Project Managers, and DevOps Engineers.

Goals

Learn how to version control with Git.

Contents

- Repositories
 - # Setup
 - # Access
 - # URL Schemes
- Fundamental Operations
 - # Tracking Changes
 - # Adding files
 - # Removing files
 - # Merging
- History
 - # Inspection
 - # Altering

This training can be tailored to organizational needs to include specific exercises, and to show the UI of well-known Git front-ends, such as Atlassian Bitbucket, GitHub, GitLab, or Microsoft Team Foundation Server.
